## ergonomic task chair

Introducing the Gregory Scope, Australia's premier ergonomic office chair that seamlessly marries aesthetic appeal with ergonomic precision. Designed and manufactured in Australia, the Scope offers a sophisticated seating solution that prioritises both style and comfort.

This ergonomic masterpiece, with its sculpted square back design, captivates architects and designers with its unique contours and modern appeal. The refined contouring of the lateral and lumbar support ensures an ideal sitting posture, providing support where it's needed most and reducing the risk of back strain and discomfort.

The Gregory Scope is available in either a medium or high back design, with seat sizes that range from small to large. This range ensures that every individual can find a perfect fit, customised to their unique body shape and seating preference.

At the heart of the Scope's ergonomic design is the Gregory Dual Density Posture Support seat technology. This ground-breaking feature offers superior comfort and promotes correct seating posture, helping to alleviate the discomfort associated with extended periods of sitting.

The chair's user-friendly 3-lever independent mechanism allows for easy adjustment of seat height, seat tilt, and back angle, providing a truly personal seating experience. Further enhancing its ergonomic advantage is the anti-

slip ratchet back height adjustment, ensuring your backrest remains in your desired position.

Sturdy and durable, the Gregory Scope is AFRDI 160kg certified, signifying its ability to sustain intensive use while maintaining its structure and performance.

When it comes to your office comfort, choose the chair that combines cutting-edge design, superior comfort, and robust durability – choose the Gregory Scope...
